

SafelinkID

Secure File Solutions For Everyone

"Smart Solutions for Strong Security"

Why **SafelinkID** Solutions

- **Easy to use and SafelinkID works with your individual clients to get them up and running**
- **You and Your client's data is protected and private**
 - Secure sockets layer (SSL) / Virtual Private Network
 - Two-Factor Strong Authentication one time password utilizing the users a cell phone, e-mail, PDA, or pager
 - All data transfers are protected by commerce grade encryption technology.
- **You get to make the rules – tailored to your business and your client**
 - Multiple permission levels limit access privileges of each user
 - Control over who accesses financial data, what they can see and what they can do with it
- **Everyone is held accountable**
 - Unique Always-On Activity Log and Audit Trail records every user who logs into the service and any changes made to every transaction. This feature meets the most stringent compliancy rules and regulations.
 - Always have available a “paper trail” to trace transactions back to their source. These Logs can be placed in a spread sheet for easy viewing.
