Company Name has partnered with SafelinkID to provide a new, time saving and cost cutting service. WebDog™ QuickBooks Secured File Server.

**Live 24x7x 365
Technical
Support**

- **Securely Transfer Files of Any Size, Anywhere, Anytime**
- **Above Federal Industry Security Standards**
- **Get the Latest Version of QuickBooks**
- **No Additional Software Installation Required**

- **Provides GLBA Compliance**

A fully compliant **Gramm-Leach-Bliley Act (GLBA)** Solution that allows Certified Public Accountants (CPA's) and their clients to share critical financial data securely from anywhere in the world. You simply logon with any internet connection using a unique One-Time password to start sharing your files with confidence. WebDog™ Managed Service removes the risk that an individual's data and identity will be compromised. Sign up today and get a Free Licensed Copy of QuickBooks® Pro 2009.

- **Secure Managed Service**

Protected by commerce grade encryption technology and firewall-protected servers WebDog™ security levels are above ones used by the world's top banking and healthcare institutions today.

- **Feel Safe and Secure**

Using WebDog™ Secure Socket Layer, Virtual Private Network (SSL/VPN) ensures that your personal information remains private. These steps include a strong two-factor authentication technique to clearly identify users and secure data transmission and a state of the art program that enables you to transmit these files of any size to whom ever you need with lightning speed.

- **iDocSecure EDI - Also Available**

Secured Electronic Document Imaging converts your paper files to electronic data. Electronically scan, fax and store all of your data for secure compliance. Access, anywhere, anytime, any size!

- **Secure Access Control**

You can access your financial data anywhere in the world. Once signed in, you can access only your pre-authorized files. Simple, Secured, and Controlled, making each user experience unique to their account.

- **Real Time Accountable Reports**

Everyone is held accountable. WebDog™ offers a unique "Always-On-Activity Log" and Audit Trail. Get an easy to read history of all changes, adjustments, or modifications that were made to a transaction instantly.

- **Back up and Storage**

SafelinkID's offsite data center stores and backs up all of your data every night automatically. **No Client software installation required.** Access your data via the web anytime, anywhere. It's easy!
