iDocSecure Electronic Document Imaging

The Turn-Key Secure Single Server Solution For Imaging Documents

GLBA
Compliant
Paperless Office

iDocSecure offers many time and space saving benefits. It includes easier access to your files and additional security features over traditional “Paperless Office” Solutions. By using **iDocSecure** you will reduce costly employee time spent retrieving, filing and sorting through documents. This provides more quality time available to you and your workforce. While your competitors spend time and money on

unnecessary storage space, you will be saving money by eliminating the need for files, folders, file cabinets and other filing material. Accessibility is as important as saving money and by electronically storing your data you will gain the convenience of being able to access your files from anywhere in the world. Government Regulations require businesses to protect the confidentiality of the consumer; **SafelinkID Secure File Share** complies with current **HIPPA** and **GLBA** regulations. Additional Security features can be customized to meet any company’s unique needs, including control over who sees what documents and what rights they have to those files.
